fast facts

Est. 1994

Founded by outdoorsman and optometrist Dr. Gary Nesty

Frame designs and lens tints field tested by professionals

Pro staff includes 6 BASSMaster Classic winners and 6 B.A.S.S. Angler of the Year professionals

Pioneer of double gradient polarized tints including the Mossback® gradient, amber gradient, Mossback® ITH and Amber ITH lenses

*Designed by the Doctor
for comfort & fit*

Frames

Metal frames are constructed of aluminum or Solar Bat®'s proprietary Durolar. All other frames are constructed of high performance TR90. All materials are light in weight yet rugged enough to carry the Solar Bat® name. Temple boots and nose pads are TCG material exclusive to Solar Bat®. TCG (Temperature Controlled Grip) actually increases facial grip, as the temperature gets hotter. Solar Bat® knows you do not want your sunglasses to use your nose as a ski slope in hot weather.

Simply the **BEST** Warranty out there...

No tricks. No nonsense. We are proud of the warranty we provide. As long as you own the sunglasses, broken frame parts are replaced at shipping and handling cost. No questions asked - PERIOD!

LENSES

Let the Doctor protect your eyes & enhance your performance!

Lens Construction

All Solar Bat® lenses are constructed of our proprietary Noctular® lens material. Glass and hard resin lenses are for wimps who are not serious about outdoor performance. The Noctular® material far exceeds all government standards for impact resistance and is infinitely safer to wear than glass or hard resin lenses. And that information is straight from the Doc. Noctular® lenses feature the ultimate polarizing film encapsulated within the lens so it will never peel off or fade. We double coat our Noctular® lenses, both front and back surfaces, with a super scratch coat. The Noctular® material is a total UV block and for added protection we incorporate a UV block into our polarizing film as well. Doc believes that it is better to have too much protection than not enough.

Warranty

Damaged lenses are replaced at only \$15 a lens for as long as you own the glasses. Even if your dog chews them up!

Tints that make a Difference!

Solar Bat® uses selective wavelength filtration to highlight sport specific colors, while bleaching out other color distractions. **WHY POLARIZED?** Glare is to your vision as static is to your hearing. Polarization eliminates glare thus improving visual acuity.

Mossback®

Gold Mirror Option 

- Brightens greens & bleaches out browns
- Designed for fishing and watersports
- 15% Transmission

No Nonsense Warranty

All Solar Bat® sunglasses come with a plain spoken warranty. Manufacturer's defects are covered for 90 days from date of purchase. After 90 days any damaged lens is replaced for \$15.00 and any damaged frame or frame part is replaced for \$10.50 shipping and handling as long as you own the sunglasses. Solar Bat® reserves the right to substitute product of equal value and warranty applies to the original purchaser. Lens warranty does not cover changes in prescription or lost sunglasses.
